Feature	Action Required	Application	Description	Release Date
FedEx Integration	Yes	Storefront	Improvement: All of the existing Fedex Actual Rate Shippers will now use the new Fedex Integration using their new FedEx API. FedEx is deprecating the old integration using access keys on June 1st, 2026.	May 21, 2026
Punchout	No	Storefront	Improvement: The ability to map data from the Punchout Order Request to Custom Order Fields was added.	May 21, 2026
UPS Integration	No	Storefront	Task: Update the UPS API Rest Token duration from 4 hours to 1 hour to accommodate changes to the UPS API.	May 21, 2026
CardConnect	No	Storefront	Task: Update the Test and Production URLs for CardConnect to accommodate changes to the CardConnect API.	May 21, 2026
Payflow Pro	No	Storefront	Bug Fix: Resolve issue with Payflow Pro integration when Level II Reporting enabled and the order had \$0 Subtotal and Shipping/Tax amounts.	May 21, 2026
Order Pull	No	Storefront	Bug Fix: Resolve issue with the Order Pull service when the From User on the order was deleted after the order was submitted.	May 21, 2026
Order Pull	No	Storefront	Improvement: Support for Custom Message Processors (CMP) added to the Order Pull service to allow for customization of the Order Pull XML.	May 21, 2026

USPS	No	Storefront	Improvement: Build integration to the new USPS API due to the old USPS RateV4 service being deprecated by USPS.	May 21, 2026
Punchout Inventory	No	Storefront	Bug Fix: Available Inventory is no longer being decremented during punchout sessions when line items are removed/modified on the Cart page.	May 21, 2026
Admin Order Search	No	Storefront	Bug Fix: Available inventory is no longer incremented when unsubmitted orders are deleted on the Order Search page of the Admin interface.	May 21, 2026
Transafe	No	Storefront	Bug Fix: Transaction errors have been resolved with orders have a greater tax/freight amount than the transaction amount with split billing.	May 21, 2026
Punchout	No	Storefront	Improvement: Support for Replenishment Orders was added to the Punchout flow.	May 21, 2026
Zip-Tax	No	Storefront	Improvement: Updated Zip-Tax integration to use a dedicated URL to improve performance with the Zip-Tax integration.	May 21, 2026
Address Verification	No	Solutions Library	<p>New Feature: Verifying an address that is entered by a buyer user is now possible! The Address Verification custom solution was added to the Solutions Library to allow you to implement it across your Storefront 2.0 sites. The address information is sent to USPS's API when the user creates an address and the USPS suggested address is presented to the user in a pop-up box.</p> <p>Solution Details: https://github.com/Four51/CustomSolutions/tree/master/Addresses%20Verification</p>	May 8, 2025

User.Company object	No	2.0 API	Improvement: The Buyer Company Interop ID was added to the User.Company object in the Storefront 2.0 API. That value can now be used to help with customizations on Storefront 2.0 sites. {{user.Company.InteropID}}	May 8, 2025
Order Request to Self	No	Storefront	Improvement: There was a one-minute delay added to Order Request to Self transactions to give time for ERP systems to first receive the Order Request transaction.	May 8, 2025
Order Request	No	Storefront	Improvement: The max length of the Order Request URL was increased to 1000 characters.	May 8, 2025
Punchout	No	Storefront	Improvement: There is a new piece of data that can be sent back to procurement platforms in the punchout order message: Variant API Interop ID	May 8, 2025
Seller Order Detail Page	No	Storefront	Fix: The Payment Method is now displayed appropriately on the Seller Order Detail page for archived (older than 90 days) orders that had split billing.	May 8, 2025
Infrastructure	No	Storefront	Improvement: Support for TLS 1.3 connections was added for incoming transactions like Punchout and Web Services.	May 8, 2025
Reporting Services	No	Reporting	New Feature: Automated Reports are now possible with reports in the Reporting Dashboard. Contact Support for more information on how to get an automated report setup/scheduled.	May 8, 2025
Reporting Services	No	Reporting	Improvement: Shipment Report – A new standard report was added that will allow the downloading of shipment data.	May 8, 2025
Reporting Services	No	Reporting	Improvement: VBOSS Batch Upload Report - A new standard report was added that will allow downloading the variants based off of selection specs in the VBOSS Batch Upload format.	May 8, 2025

Auto Emails – File Spec Links	No	Storefront	Improvement: There are new Auto Email tags to add support for putting the URL to uploaded files to file specs in Auto Emails. When an end user uploads a file to a file spec, you can now receive a URL to that file in Auto Emails to help with fulfillment processes. Please check the Auto Email Help page for further details on the new Uploaded File tags.	September 11, 2024
Punchout – Custom User Fields	No	Storefront	Improvement: Added support for setting custom user field values with data in the punchout setup request. Please contact support if you would like to find out more about implementing custom user fields to an existing punchout.	September 11, 2024
Distributor/Supplier Interfaces	No	Storefront	Security Improvement: For security purposes, the distributor and supplier interfaces will no longer be allowed to be run in a frame.	September 11, 2024
2.0 Punchout Custom Solution	No	Custom Solutions	Bug Fix: The 2.0 Punchout Custom Solution was updated to resolve the issue of the Submit button being able to be clicked multiple times.	September 11, 2024
Credit Card Transactions	No	Storefront	The Currency Code can now be passed along with the Payflow Pro transactions to provide support for non-USD currencies.	May 29, 2024
UPS Integration	No	Storefront	All of the existing UPS Actual Rate Shippers will now use the new UPS Integration using their Oauth method of authentication. UPS is deprecating the old integration using access keys on June 2 nd , 2024.	May 29, 2024
Company	No	Storefront	The issue with the Afghanistan time zone appearing in the Time Zone drop down for the Central time zone on the Company Edit page has been resolved.	April 18, 2024
2.0 Sites	No	Storefront 2.0	The Partitioned cookie attribute has been added to Storefront 2.0 sites which will allow 2.0 sites to run in a frame for users	April 18, 2024

			using Chrome/IE Edge when they stop supporting 3 rd party cookies.	
UPS Integration	Yes	Storefront	A new UPS integration has been created utilizing the new UPS Oauth/REST integration. The current UPS integration will be deprecated by UPS on June 2, 2024. If you are using custom UPS credentials to get your UPS account discounts, you will need to update to the new UPSRest integration on the Shipper Edit page under Actual Rate Shippers.	April 18, 2024
Reporting Services	No	Reporting	A new standard report was added to the Reporting Services Dashboard that will allow you to view/download data to find which products are commonly ordered together.	April 18, 2024
Data Delivery Package	No	Data Delivery Package	Data has been added to support orders with multiple payment methods.	April 18, 2024
Data Delivery Package	No	Data Delivery Package	Static Spec data at the Variant level has been added to the Data Delivery Package.	April 18, 2024
Affected Files		Storefront 2.0	app/js/controllers/Four51Ctrl.js	August 24, 2023
Tax Integration	No	Storefront	There is a new real-time tax integration to Zip-Tax. Select the "Use Zip-Tax Tax Web Service" option on the Sales Tax Companies page to enable for a buyer company. The shipping City, State, and Zip code are passed to Zip-Tax to achieve a more granular level of tax rate on the order.	August 24, 2023
Web Servies	No	Storefront	A new web service has been added to allow the automation of getting Spending Accounts to help with integration opportunities. Name: GetByInteropID	August 24, 2023

Anonymous User	No	Storefront 2.0	The issue with the product details not appearing on the Product Details page when arriving to the site via a direct product link as an anonymous/temp user has been resolved.	August 24, 2023
Affected Files		Storefront 2.0	app/js/controllers/cartCtrl.js	May 16, 2023
Cart	No	Storefront 2.0	The issue with removing a line item on the cart page has been resolved.	May 16, 2023
Affected Files		Storefront 2.0	app/js/controllers/cartCtrl.js app/partials/Conditions/conditions-en-US.html app/partials/Security/security-en-US.html app/js/controllers/addressInputCtrl.js	March 2, 2023
Edit Order For Approval	No	Storefront 2.0	The following issue with the base Storefront 2.0 site has been resolved: The Shipper Name is deleted on an order when an approving user removes a line item when editing an order for approval and then clicking the Back button on the browser and approving the order. Changed Files: app/js/controllers/cartCtrl.js	March 2, 2023
Security - Privacy Policy	No	Storefront 2.0	The Privacy Policy link in the Conditions of Use section now points to the Sitecore Privacy Policy. Changed Files: app/partials/Conditions/conditions-en-US.html app/partials/Security/security-en-US.html	March 2, 2023

Password Reset		Storefront 2.0	The 2.0 Forgotten Password email is now being sent instead of the 1.0 Forgot Your Password email when a user requests a password be changed on the Admin/Identify User page of a 2.0 site.	July 8, 2019

1.0 Form Fields		Storefront 1.0	Cross-site scripting prevention measures are now in place for specific fields on the 1.0 buyer, distributor, and supplier interfaces.	July 8, 2019
Reporting		Storefront	An apostrophe will be prepended to all values in download CSV reports that start with one of these characters to prevent CSV Injection: =, +, -, @ - Specifically in the remainder of reports that are affected.	July 8, 2019
Affected Files		Storefront 2.0	app/js/services/userService.js	June 19, 2019
Logon/Password Reset		Storefront 2.0	The issue with resetting your password and logging on appropriately has been resolved.	June 19, 2019
Gift Card Transaction Report		Storefront	The issue with running the Gift Card Transaction Report that contains data with negative adjustments has been resolved.	June 19, 2019
Affected Files		Storefront 2.0	app/js/services/userService.js app/js/controllers/checkOutViewCtrl.js app/partials/Conditions/conditions-en-US.html	June 6, 2019
Infrastructure		Storefront	Client and application files are moving to a new infrastructure solution to provide better reliability and scalability. Instances of paths to shared Pageflex Project Files (\\storage2012 and \\storage2) in Themes, Pageflex Projects, Database tables will be automatically updated to point to this new location: \\Storage\Files\ProjectFiles\Shared	June 6, 2019
2.0 Logon		Storefront 2.0	Enhancement to the 2.0 Logon functionality to utilize a new 2.0 API endpoint to authenticate a user using the POST method. Changed Files: app/js/services/userService.js	June 6, 2019

2.0 Order Submit		Storefront 2.0	The intermittent issue when the shipping cost is incorrect on order submission for users using multiple browser windows has been resolved. Changed Files: app/js/controllers/checkOutViewCtrl.js	June 6, 2019
Conditions of Use		Storefront & 2.0	The Conditions Of Use language has been modified to include information related to the responsibility of security compliance on custom 2.0 sites/repositories. Seller users will be required to accept the new Conditions of Use. Changed Files: app/partials/Conditions/conditions-en-US.html	June 6, 2019
2.0 Edit Order For Approval		Storefront 2.0	Issue Resolved: The split billing payment amounts are now correct when an approving user edits an order for approval that lowers the order total below the spending account balance and approves the order.	June 6, 2019
Reporting		Storefront	An apostrophe will be prepended to all values in download CSV reports that start with one of these characters to prevent CSV Injection: =, +, -, @	June 6, 2019
Minify Sources		Storefront 2.0	Performance improvements have been made to the process to minify 2.0 files when changes are made to 2.0 site files and when users logon to 2.0 sites.	April 10, 2019
2.0 Order Save		Storefront 2.0	Performance improvements have been made to the Order endpoint (POST). This endpoint is called when orders are saved.	April 10, 2019
Data Delivery Package		DDP	The APIInteropID column has been added to the Product and Variant tables.	April 10, 2019

Theme/File Access FTP	Yes	Storefront	The deprecated themes.four51.com and wfftp.four51.com FTP sites will no longer be accessible. The new appFTP.four51.com FTP site will need to be used moving forward for Themes and FTP File Access. Information on how to access the new FTP sites can be found on the Themes and FTP File Access pages of the Admin interface.	January 10, 2019
Punchout - Inbound		Storefront	Punchout Management Enhancements - Additional punchout self-service options are now available (upon request).	January 10, 2019
2.0 Admin page		Storefront 2.0	The intermittent issue on the 2.0 Admin / Identify User Page with the "Username already exists" error message appearing erroneously has been resolved.	January 10, 2019
2.0 - Product List / Search		Storefront 2.0	Performance improvements to the 2.0 Product List and Search Results pages (/products 2.0 API endpoint).	January 10, 2019
2.0 Sites		Storefront	After a buyer company has been deleted, the 2.0 site(s) under the buyer company will no longer be accessible.	January 10, 2019
Payflow Pro		Storefront	The issue with having the Level II Reporting permission assigned and an order having two payment methods has been resolved.	January 10, 2019
Themes FTP		Storefront	<p>The Themes FTP will be changing to behave like the Pageflex Project FTP currently functions, with logging on using the credentials of the Four51 User. The Themes page on the admin interface will provide instructions on how to access the new FTP site.</p> <p>NOTE: The current Themes FTP (themes.four51.com) will remain active for a period of time to allow clients to switch to the new Theme FTP method. Further details will be provided</p>	November 15, 2018

			post-release.	
File Access FTP		Storefront	<p>The File Access FTP will be changing to behave like the Pageflex Project FTP currently functions, with logging on using the credentials of the Four51 User. The FTP File Access page on the admin interface will provide instructions on how to access the new FTP site.</p> <p>NOTE: The current File Access FTP (wfftp.four51.com) will remain active for a period of time to allow clients to switch to the new FTP File Access FTP method. Further details will be provided post-release.</p>	November 15, 2018
Themes		Storefront	The Themes area under the Admin top navigation will now always appear for admin users that have the Edit Themes permission. Before this change, the Themes area did not appear if all buyer companies had a Default 2.0 Site assigned.	November 15, 2018
Emails		Storefront 2.0	Emails for orders from Storefront 2.0 sites that use a culture other than United States will now reflect the appropriate language in the emails.	November 15, 2018
Coupon Edit page		Storefront	The value in the "Discount Amount" drop down now reflects the correct value while using the Google Chrome browser.	November 1, 2018

			<p>app/js/directives/match.js</p> <p>app/partials/userView.html</p>	
Spending Accounts	x	Storefront	<p>When using a spending account as a payment method, the balance does not calculate correctly when Account Type is configured for a value less than 100 for the Max Percentage of Order Payable From Account.</p> <p>Changed Files: app/js/services/orderService.js</p>	March 2016
Static Specs	x	Storefront	<p>Specifications table now displays within the product variant view.</p> <p>Changed Files: app/partials/controls/staticspecs.html</p>	March 2016
Variable Specs	x	Storefront	<p>The default value for a variable spec displays "Null" when the default value for the spec is a Custom User Field without a value.</p> <p>Changed Files: app/js/controllers/specFormCtrl.js</p>	March 2016
Fixed Footer	x	Solutions Library	<p>Affix stationary content at the bottom of your site. The fixed footer creates an area that is locked in place making the content always visible to your users.</p>	January 2016
Hamburger Navigation w/ Sub Categories	x	Solutions Library	<p>For sites with complex category hierarchies, this Hamburger Navigation expands categories cleanly from a mobile view, and minimizes the expanded navigation once a selection is clicked open.</p>	January 2016

Featured Items	x	Solutions Library	Add a section on your site to highlight products, deals, and discounts using the Featured Items solution.	December 2015
Hamburger Navigation	x	Solutions Library	Use the Hamburger Navigation module to place the common three-barred icon in your top navigation when viewing on a mobile device. When users click on the Hamburger icon, a full menu of the items in the top navigation will appear below the Hamburger.	December 2015
Product - Variable Specs			The value in the "Label" field for a variable spec is now copied when products are cloned.	December 2015
Security	x		All URL's for the application are now HTTPS. References to files that reside in Four51 theme directories that use http:\\ have been replaced in the database with https:\\. Action may be required for Administrators to use relative or HTTPS links to avoid mixed content errors. Learn more about Mixed Content here .	December 2015
Security			The security protocol for user passwords has been upgraded from MD5 to SHA-256 hash.	December 2015
Help			An admin or supplier user is able to click on Help\Find Answers to view the Customer Success site which provides General Information, Application Knowledge, and Case Submission and History.	October 2015
Themes		Storefront	The Themes tab has been removed from Custom 2.0 applications while additional development occurs on a solution that goes beyond changes to the style sheet.	October 2015
Modal Window	x	Solutions Library	A modal window (dialog box) can be implemented to force a user to interact with it before they can go back to using the application.	October 2015

Affected Files		Storefront	js/controllers/approvalInputCtrl.js js/controllers/navCtrl.js partials/controls/customCheckBoxField.html partials/controls/customDateField.html partials/controls/customPhoneField.html partials/controls/customTextField.html partials/controls/customTimeField.html partials/controls/fileUpload.html partials/controls/nav.html partials/controls/orderBilling.html	July 2015
Add to Cart - From Product List Page	x	Solutions Library	A user is able to add a product to the cart directly from the Product List view in addition to the Product Detail view.	July 2015
Billing Address Display	x	Storefront	The billing address is displayed on the order billing page with a comma between the city and the state. Changed Files: partials/controls/orderBilling.html	July 2015
Cart Icon	x	Storefront	After an order requiring approval is submitted, the shopping cart icon no longer persists in Internet Explorer. Changed Files: js/controllers/navCtrl.js partials/controls/nav.html	July 2015
Cost Centers			Large lists of cost centers are visible from the group level.	July 2015
Custom Applications			Deleting an App Code Folder\Repository removes it from the Application dropdown for Custom 2.0 Applications Properties.	July 2015

Custom Field Display	x	Storefront	All custom field directives have a ng-class for "required". Changed Files: partials/controls/customCheckBoxField.html partials/controls/customDateField.html partials/controls/customPhoneField.html partials/controls/customTextField.html partials/controls/customTimeField.html	July 2015
Delete User Variants	x	Storefront	Users with "View Product Variants For All Buyer Users" permission enabled are able to delete variants created by other users. Changed Files: partials/controls/fileUpload.html	July 2015
Promotion Report - Coupon			The "Coupon Status" report available from "Promotion Reports" displays the balance for decrementing coupons.	July 2015
Shipping Address Display	x	Storefront	The shipping address is displayed on the order page below the "Ship To" label for the approving user when an order has been approved. Changed Files: js/controllers/approvalInputCtrl.js	July 2015
User Experience - Carousel	x	Solutions Library	Use the bootstrap carousel module to cycle through images and content to drive attention to sales, promotions, announcements, products, etc., from anywhere in a site.	July 2015
Add to Cart - Mutiple Variants at Once	x	Solutions Library	A user can generate a list of multiple line items for one product directly from the spec form, and then add the	June 2015

			entire list to the cart.	
Addresses - Search	x	Solutions Library	A user is able to search for a desired address from a large list.	June 2015
Addresses - Same as Shipping	x	Solutions Library	A checkbox can be added to the billing section to use the address that was selected for shipping.	June 2015
Product Display - Matrix	x	Solutions Library	A user is able to add quantities for an item and its variants in a grid format, and then add the items with quantities from the grid to the cart.	June 2015
Product Display - Zoom	x	Solutions Library	A product image can be magnified in its entirety or within a lens that provides a user greater detail into the product image.	June 2015
Application Emails	x	Solutions Library	A library of HTML templates is available for the Auto Emails sent from your OrderCloud application.	May 2015
Site Navigation - Slide Out	x	Solutions Library	Create a navigation item that will initiate a slide out panel.	May 2015
User Identity	x	Solutions Library	Redirect an anonymous user to the user admin page in order to profile themselves at any step within their catalog workflow.	May 2015

Product/Cart Kits			Ability to use Kits in 2.0.	February 2015
Spec Form			List out all the variable specs in the spec form by default.	February 2015
2.0 Punchout			Level 2 Punchout Functionality is now available in 2.0.	February 2015
Admin/1.0			Turn off 1.0 for all new buyers.	February 2015
XLAT Service			Now displaying "0 Values" within the application.	February 2015
Admin/User Navigation			Allow navigation directly to the user information page.	February 2015
Credit Card			Allow the use of the current year when validating the credit card information.	February 2015
Logon			After you reset your password and log off, the reset	February 2015

			button will no longer be visible.	
Category View Design			Improved design in category view.	February 2015
Custom Messages			Remove extra spacing on custom message partials.	February 2015
Address List Search			Address list search is now functioning correctly.	February 2015
Messages Feature			Functionality improvement around the messages feature.	February 2015
Spec Form/Variable Specs			"Other" value no longer displays blank field unless the permission is checked in admin interface.	February 2015
Order ID			Add Order ID to the 'PrintView' PDF after order submit.	February 2015
Anonymous User/Order			Hide "Favorites" field when signed in anonymously.	February 2015
Account Nav			Improved design and responsiveness of account navigation.	February 2015
Checkout/Shipping			The ship method icon is hidden if no shippers are assigned.	February 2015
SpecForms/mpower Variants			Allow for Line Breaks in text areas to render in pageflex preview.	February 2015
Address List View			Improved design on the address list view on mobile.	February 2015
Account/Address List View			Disable delete button if there are no existing addresses.	February 2015
Responsive Navigation			Allow access to the other options in the admin tab if you don't have View Self Admin permission.	February 2015
Order Details			Cost center label is hidden when no cost center is assigned.	February 2015

Order Details			Display auto id text when Allow Auto Gen POID is not selected.	February 2015
Gift Card/Promotional Spending Account			Updated design around the spending account/split-billing feature.	February 2015
Order Submission			Unknown character fix for credit card transactions.	February 2015
Variable Product			Data-source based on Group or Username fixed.	February 2015
Affected Files			<ul style="list-style-type: none"> • js/controllers/userEditCtrl.js • js/interceptors.js • js/services/userService.js • partials/userView.html • partials/searchView.html • js/controllers/loginCtrl.js • js/services/productDisplayService.js • js/controllers/four51Ctrl.js 	December 2014
Anonymous User Password Reset			Anonymous users will now have the ability to reset their password.	December 2014
Anonymous User Log-In Save			In this release we fixed a bug that was causing issues with new accounts created as an anonymous user. You are now able to log-in as these new accounts that you create.	December 2014
Google Analytics Access for Anonymous Users			We made an update to allow anonymous users to use Google Analytics.	December 2014
Ship Weight API Functionality			The ship weight API property was not functioning properly. This was fixed for this release.	December 2014
Outbound Punchout 2.0			In this release we fixed a bug that was affecting Outbound punchout 2.0.	December 2014

Tax Amounts			There was an error with displaying large tax amounts before a shipping address was selected. It was corrected for this release.	December 2014
Variant Search Box			The variant search box should only appear for products with variants. With this release, the search box will not display when no variants exist.	December 2014
Search Result Improvement			In this release we fixed a bug that was inhibiting valid search results from returning after searching for an incorrect result.	December 2014
Email Validation			Four51 supports the ability for a buyer-user to have multiple email addresses assigned to their username in the user email address field. In this release we fixed a bug that was preventing this feature from performing as designed.	November 2014
Google Analytics Tracking			Four51 supports Google Analytics Tracking. In this release we fixed a bug that was preventing some site traffic data from being collected. For more information on Google Analytics see the Knowledgebase Article Click here to see the Knowledgebase Article on Google Analytics	November 2014
Localization			German has been added to the list of supported languages.	October 2014
Currency			The ability to have a company/group/user view the site in all points-based currency is now available at no charge. Please submit a case or contact your Account Representative to have it enabled for your account.	October 2014
Proof/Production Jobs			When saving proof and production jobs on Four51, the Variant ID will now be the default in the Save File As box	October 2014

			instead of a long alpha-numeric string.	
Forgotten Password Email			If you are using a custom logon page, you are now able to limit the users that appear in the Forgotten Password email to just the users in your specific buyer company. You would add a new paramter, "cid", with the unique company identifier. The identifier can be found on the Logon Page Configuration page in the left navigation under a buyer company. Example: cid=b1110557-13ac-49fc-a932-6b6d4db595bc	October 2014
Variants			PNG files are now supported.	October 2014
OrderCloud 2.0 New Supported Features			<ul style="list-style-type: none"> • Inbound and Outbound Punchout • Advanced Reporting • Edit Order for Approval • Multiple Shopping Carts • Ship Tracking Links in Order History • Replenishment Orders 	October 2014
Rebranded Logon Page			The standard Four51 logon page (http://www.four51.com/ui/logon.aspx) has been updated to reflect Four51's new OrderCloud-centric branding. The basic layout and functionality of this page is unchanged.	June 2014
OrderCloud 2.0 Admin User Permission			If the Admin Environment is enabled for OrderCloud 2.0, all Admin users who currently have the Create and Modify Admin Users permission will now have access to a new permission: OrderCloud 2.0. This permission allows users to create and manage OrderCloud 2.0 apps, and it will be enabled by default. Admin users with the Create and Modify Admin Users permission can enable the OrderCloud 2.0 permission for	June 2014

			a coworker without also having to enable the Create and Modify Admin Users permission.	
Web Services			<p>A new optional element named APIInteropID has been added to the web services noted below:</p> <ul style="list-style-type: none"> ● Product – SaveProducts ● Product – SaveVariants <p>If no value is specified for APIInteropID or if the entire element is excluded, then a random string will be set for the API Interop ID field for that product.</p>	June 2014
Buyer Interface Scripting			Four51 user details like Username, First Name, Last Name, Email, Phone, InteropID, CompanyInteropID, User Type, User Last Logon date, User Groups, Group InteropID, Approval Groups, Custom User Field Name, and Custom User Field Value are accesible on the buyer interface via Javascript (JSON).	November 2013
Coupon Admin			An "Active" column has been added to the coupon assignment page to indicate whether a user is active or inactive when assigning a coupon to the user.	November 2013
External Site Access - Link Builder			A column has been added to include the URL to use for the configured link.	November 2013
Project File Upload Utility			A new method has been added to upload Pageflex project files via FTP. The existing project file upload utility will continue to be supported but cannot work when a user's device contains Microsoft .NET version 4.5 or later. Because Windows 8 requires .NET 4.5 existing workarounds fail requiring the user to upload using FTP.	November 2013

Site Logging			Logging now includes when a product is deleted and by which user.	November 2013
Approval Process			A new permission has been added that allows a user to approve/decline any order from their buyer company they have access to view. Permission: Approve All Orders.	October 2013
Auto Email			<p>When a buyer user places an order, the admin user is notified via email that the new order is received. Prior to this release, this email was being sent from the buyer user's email address. Modern spam filters will often reject this message because the spam filter is able to detect that the message was actually being sent from Four51.com and NOT the buyer user's email. If the admin user were to reply to the message, it would be addressed to the buyer user's email address.</p> <p>To prevent spam filters from blocking the New Order Received messages, the email will be sent from DoNotReply@Four51.com. An admin user can change the "From Email" address from DoNotReply@Four51.com to another address by customizing the New Order Received Auto Email. Changing this value may cause this message to become undeliverable. If the ReplyTo Email value is blank, it will continue to be populated with the buyer user's email address.</p> <p>If the recipient of the message prefers to see who the order is coming from without opening the message, the Subject section of the Auto Email could be modified to something like: You have a new order [[OrderID]] from [[Email]].</p>	October 2013

Browser Support			Internet Explorer 10.0 is a supported browser.	October 2013
Coupons			A coupon can be configured to be applied per quantity on an order.	October 2013
Infrastructure			Upgrades to the infrastructure include a Dell EqualLogic SAN upgrade, Windows Server 2012 R2, SQL 2012 R2, VMware 5.1, and annual PCI certification. Click here to obtain the updated Four51 Technology Guide.	October 2013
Product Admin			The Product Interop ID input box has been extended on the Product Properties page to improve on screen display for longer values.	October 2013
Product List			The [[Price]] and [[PriceSchedule]] tokens will now display on the Product List page in all situations, not just when the product can be ordered from the Product List page. NOTE: This affects existing buyer sites that utilize these tokens on the Product List page.	October 2013
Shipping			Four51 switched from using a third party shipping rates provider (Aivea) to creating a direct integration with UPS. Negotiated Rates are now accurately returned when setting up UPS shipping with a customer owned account number.	October 2013
Site Customization			The jQuery library made available for site developers to script against has been updated from version 1.3.2 to 1.9.1. jQuery Migrate was implemented to help with the transition. jQuery Migrate will display errors/warnings in the console of the browser and let the page function normally when it comes across most changed/deprecated functions. NOTE: This affects any area of an existing buyer site that has been customized with additional	October 2013

			scripting.	
Text Editor			The toolbar used in the admin and buyer interfaces to create web content has been updated to CKEditor. This WYSIWYG HTML editor is cross browser compatible and includes a spell checker. NOTE: This affects existing buyer sites that utilize the toolbar and the FormatSpecValueFromToolbar document action.	October 2013
Web Services			Orders can be filtered out when using the Order Pull web service, because the Pull Status is now set to Canceled when the order has been canceled.	October 2013
Punchout/Infrastructure			Due to the upgrade to Windows Server 2012 R2, a new SSL certificate will be issued for the four51.com domain. Please contact Four51 Support to receive the new SSL certificate. NOTE: This will affect all systems that have installed the Four51 SSL certificate on their servers.	October 2013
Web Services			Improved Web Services include: <ul style="list-style-type: none"> • User – Save <ul style="list-style-type: none"> ○ FirstName, LastName, and Email are now required fields. ○ If the element is missing, then the field will not be updated: FirstName, LastName, Password, Email ○ Email format validation is now present on the Email field. 	October 2013
Shipping			Customer owned UPS or FedEx account numbers can be used to obtain discount shipping rates when using the Actual Rate shipping functionality. If you choose not to use your own rates, Four51 will use the LIST rates for	May 2013

			<p>these shippers. A UPS or FedEx developer account will need to be created and tied to the UPS/FedEx account to utilize this new feature.</p> <p>WARNING: Certain FedEx rates will be increasing after the release if you are using the FedEx Actual Rate shipping functionality. Click Here to find out more information and how to setup a developer account.</p>	
Themes			New admin and supplier themes have been created to increase the usability of these interfaces.	May 2013
